

Weekly Update

Group Name and Number: Group14 professional team

TA: Lai Yishu

We met with our TA for 60 **mins, in person/on Zoom this week.**

Item	
1.	<p>What our group has done since our last meeting:</p> <ol style="list-style-type: none"> On Monday, our team held a group meeting as scheduled, and all the members came together, and we revised the meeting time when we reached a consensus. We changed the meeting time to Wednesday. After that we started the main content of this meeting, we created a common document for team members to use to update tasks at any time and fill in everyone's progress. At the same time, we mainly discussed the details of the project function, and divided the project function into 7 modules. The detailed description of the project function of each module was assigned to the team members as a task to think about and fill in the cooperation document, and the team members were also required to complete the interaction diagram of each part.
2.	<p>Contributions of each team member since our last meeting (show overall % contribution):</p> <p>Sun Ruotong: 16.7%, Liu Xinran: 16.7%, Zhang Juncheng: 16.7%, Liu Huiyang: 16.7%, Wang Shizheng: 16.7%, Qi Te: 16.7%</p>
3.	<p>We have the following questions and/or issues that we would like to discuss:</p> <ol style="list-style-type: none"> The details of the project function have been confirmed this week, and our team still needs to further study the design of the project structure so that the project can continue to move forward. Each member must express his or her ideas to improve the design of the project. Details of technology stack selection still need to be further determined. We may probably use front-end frameworks such as react with surrounding ecology and one of the back-end frameworks such as django and flask. For the expansion and innovation of the project function, we still need to continue to study and discuss. On the premise of ensuring the completion of each person's tasks, I will conduct more in-depth research on my own responsible module.
4.	<p>What we plan to do before the next meeting:</p> <ol style="list-style-type: none"> We hope team members to complete their recent tasks well, think carefully about the details of the functional modules they are responsible for. Have a deep understanding of the project content, and strive for each

	<p>member to give more suggestions in their own areas of expertise in the next meeting to improve the expected structure of the project.</p> <p>3. We hope to complete some preliminary design drawings and further confirm the design theme at the next meeting</p> <p>4. We hope that team members can further complete the detailed functional design and provide simple design drawings at the next meeting.</p> <p>5. We hope to preliminarily screen out technical issues that need to be investigated in advance before the next meeting.</p> <p>6. We hope to determine more feature delivery time points at the next meeting</p>
